

EGP Gasoline Water Pump

Description

Perfect performance, good self-priming performance, small size, easy to install and use, with advanced micro engine, ensure the effective combustion.

Economical and practical, lightweight, silent, and low-temperature start. It is widely used in agricultural irrigation, agricultural irrigation, fire protection and other fields.

In addition, gasoline pumps are particularly suitable for industrial water supply, urban drinking water supply, fire protection, high-pressure cleaning, etc.
